

INTERACTIVE DIGITAL DISPLAYS

P06 Series

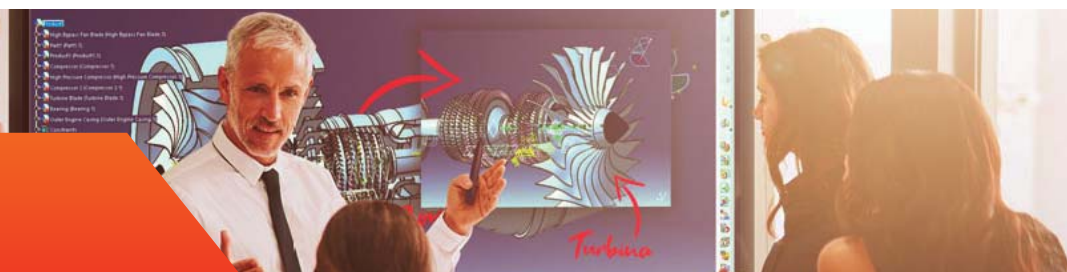

Professional solution for all types of companies. It allows for impactful presentations, more dynamic meetings, collaborative work and the enhancement of the "hybrid office" model.

The wide range of multiCLASS Touch Screens can be adapted to the needs of any environment: whether for small meeting rooms or for presentations in large conference rooms, in dimly lit rooms or with large windows for natural daylight.

More and more companies are using our technology. Interactive digital displays facilitate brainstorming, improve collaborative work and accelerate creative processes.

Professional displays for demanding environments

The multiCLASS Touch Screen displays are designed to make your users' work easier and are equipped with tools that make tasks in the most demanding professional environments more dynamic.
